

FOUR COLLECTION

Welcome to Four Collection

Your **secure** and **transparent** platform for **trading diamonds** on Web3 marketplaces.

In this PDF, we will guide you step by step through the process of purchasing a diamond via Four Collection and trading it on a Web3 marketplace.

To use Four Collection, we recommend setting up the following three crypto platforms in advance:

Coinbase: A trading platform where you can buy, sell, and securely manage cryptocurrencies.
You will need Coinbase to purchase your diamond, as Four Collection is a crypto-based application.

MetaMask: A digital crypto wallet and browser extension that allows you to manage cryptocurrencies and access decentralized applications.
You will need MetaMask to transfer your diamond to a Web3 marketplace. You can also directly purchase a diamond using MetaMask.

OpenSea: The world's largest digital marketplace for NFTs.
You will need OpenSea to trade your diamond online.

Please make sure you have registered with the above platforms before starting your diamond purchase.

Purchasing a Diamond with Coinbase

You can watch our video tutorial on how to purchase a diamond with Coinbase.

A video thumbnail with a grey border. It features a large, faint, light-grey play button icon in the center. Overlaid on the play button is the text "Purchase a diamond with Coinbase" in a dark grey, sans-serif font. The word "Coinbase" is bolded. In the background, there is a faint, light-grey wireframe of a diamond shape.

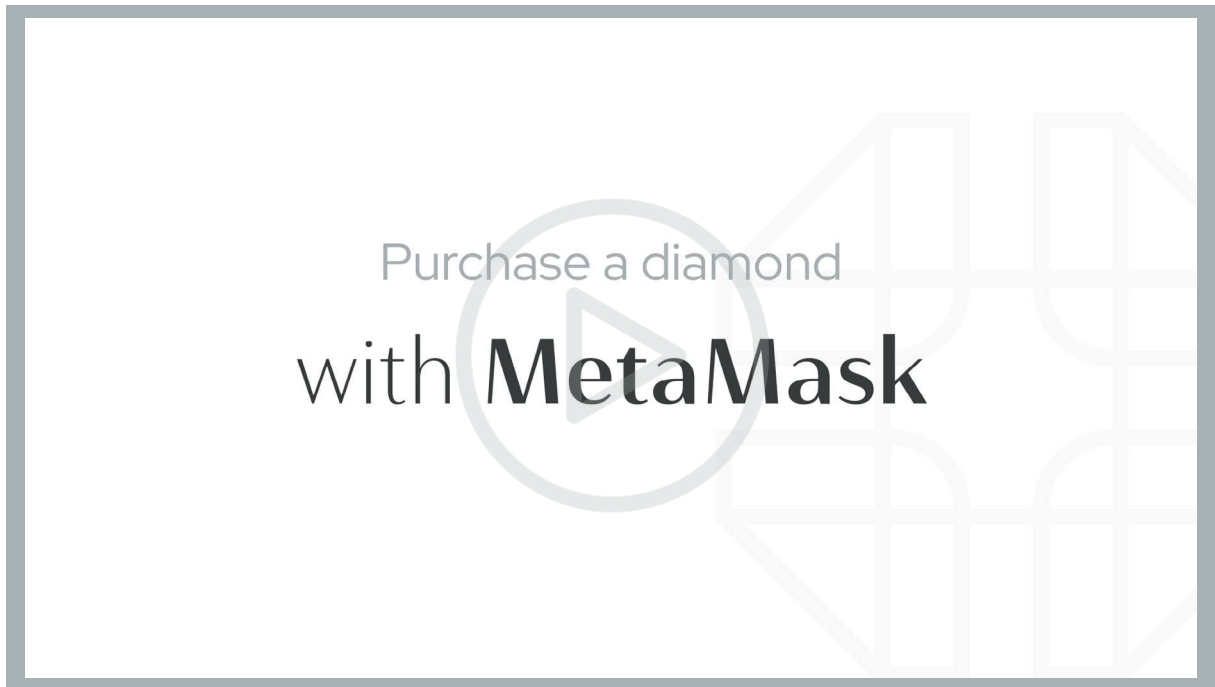

Purchase a diamond
with **Coinbase**

Transfer, Trade & Redeem Your Diamond

After successfully completing your diamond purchase, you have **three options**:

1. Hold your diamond and wait for value growth

- Investment diamonds (0.3–5 carats, D–F color, IF–VVS clarity) have historically shown an average annual appreciation of around 3–5%.
- In times of crisis, diamonds – similar to gold – are considered a stable asset.

The **two additional options** for your diamonds can be found in our video or the step-by-step guide.

You can also watch our video on how to **transfer your diamond** to MetaMask and list it for **trading on OpenSea**.

Alternatively, you may learn how to **redeem your NFT diamond for a physical diamond**.

- 
- ◆ Transfer your Diamond **into MetaMask**
 - ◆ Link your MetaMask **with OpenSea**
 - ◆ Redeem your **Diamond**
